Issue 20 Autumn/ Winter 2017

Welcome to the next edition of our practice newsletter. As well as keeping you informed of any changes happening at the practice, there is also some helpful information on some of the services we offer.

Flexible patient finance

Have you been considering dental treatment, but are worried by the cost? Whether it is straighter teeth, or a brighter, whiter smile, we can help you.

With our affordable low cost payment options to help you budget for your dental treatment it has never been easier to achieve that perfect smile!

We are aware that dentistry can be costly, especially with more extensive treatments such as root fillings, crowns and bridges or for cosmetic treatments such as tooth whitening and orthodontics.

Why not spread the cost of more extensive treatments using our flexible interest-free and low cost payment options?

Examples: - Using 0% APR and 7.9% APR Representative rates.

If you require any further information regarding any of our payment options just ask a member of the dental team who will be happy to give you a quotation.

Congratulations!

Congratulations to Francesca who has not only recently celebrated her 5 years' service at the practice, but has also successfully completed her post-graduate qualification in Oral Health Education!

Oral Health Educator Francesca

Francesca is now able to provide patients with advice and guidance on how to care for their smile.

The practice now has three qualified Oral Health Educators, and they are always on hand to answer any questions you may have regarding your oral health. Please do not hesitate to ask one of the reception team who will be happy to book a complementary appointment in our Dental Health Suite.

Treatment/ cost	Term (months)	APR	Monthly payment	Total payment
Tooth whitening	12	0% Interest free	£38.33	£460.00
Crown	12	0% Interest free	£36.06	£432.70
Bridge	12	0% Interest free	£108.00	£1,296.10
Full Invisalign	12	0% Interest free	£387.50	£4,650.00
Full Invisalign	24	7.9% Low cost	£209.06	£5,017.35

The Oral Health Educators are also committed to providing increased oral health awareness within the local community and are available to deliver complementary oral health presentations to schools, nurseries and other groups within the locality. These presentations are informative and fun, and can be tailored to your organisations particular needs. If you are interested in this service, please ask a member of the team for more information.

Oral Health Educator Katrina delivering a presentation at a local nursery school. The children love dressing up as dentists!

their children. Research shows that preventive dentistry delivered on a regular basis greatly reduces the risk of dental disease in children and provides a platform for a lifetime of improved oral health.

Don't leave your children's smile to chance - keep your children's teeth healthy for life.

We offer children's dental plans from between £3.24 per month for children up to the age of 5 years old, rising to £8.90 for older children up to the age of 18 years old. The plan covers all routine examinations, small x-rays and any necessary dietary and oral hygiene advice and is a great and inexpensive way to care for your child's smile.

Our Promise and Commitment

We are committed to providing you with a quality service, and are always seeking to improve the services that we offer.

If we please you – take one of our business cards from reception, and tell your family and friends about us. If we don't please you – please tell us!

The importance of Regular Dental Check-Ups for Children

Caring for your child's teeth is an important part of the healthcare routines that we teach and instil in them from an early age.

BBC breakfast recently reported that “The vast majority of children under three didn't see an NHS dentist last year”, and figures from the 2016 National Smile Campaign revealed that a third of children starting school have tooth decay.

These types of headlines are not uncommon, but nevertheless, extremely worrying.

Tooth decay remains the most common chronic disease in children, even though it is largely preventable. Therefore, teaching your child the importance of good oral care and setting up good tooth-brushing habits at a young age is an investment that will help your child's smile last a lifetime.

We aim to provide exceptional quality dental care for the whole family in a relaxed and friendly environment, and encourage parents to make visiting the dentist a regular and routine activity for

Final Thought!
